Audi A6 e-tron e-tron maintenance sheet

A6 e-tron · 286 PS (210 kW)

Years : 2025–present Generated on : 04 November 2026

Technical specifications

Electric Engine code : PPE

Maintenance schedule

≈: estimated reference — the vehicle’s service indicator prevails.

ITEM	INTERVAL	
Brake fluid	**Every 2 years**	At 3 years, then every 2 years. Time-based replacement, whatever the mileage.
Brakes: pads and discs	**Every year**	Check every year. Regenerative braking spares the pads, but discs can rust or seize from lack of use: an annual check is advised.
Cabin filter	**≈ 30,000 km or 2 years**	Every 1 to 2 years. Replace more often in town or if odours appear; it also protects the air conditioning and heat pump.
Tyres: wear and rotation	**Every year**	Regular checks, rotation about every 10,000–15,000 km. An EV’s torque and weight wear tyres faster: watch the pressure and rotate them for even wear.
High-voltage system check	**≈ 60,000 km or 2 years**	At each manufacturer service. Battery, cables and cooling are checked by diagnosis; qualified workshop only.

Service record

DATE	MILEAGE	WORK DONE	WORKSHOP

DATE	MILEAGE	WORK DONE	WORKSHOP

> Indicative intervals and costs: adapt maintenance to the engine, use and manufacturer’s instructions.
